

# Life cycle of EARTHIDE™

## Manufactured

Bead is produced and shipped to Plymouth Foam

## Heat Molded

Bead is pressurized and heat molded to create custom protective packaging.

## Shipped

Protective packaging is delivered and used to keep your goods safe.

## Thrown Away or Recycled

Protective packaging can be placed in the trash or recycling depending on where you live.

## Collected

Heads to either a landfill or a recycling center. Recycling will get sent back to manufacturer for reprocessing.

## Breaks Down

Foam breaks down into reusable methane, leaving no microplastics behind.

## Gathers

Landfill gathers methane gas and converts it to reusable energy.

**\*\*California Notice:** California law prohibits the sale of plastic packaging and plastic products that are labeled with the terms 'biodegradable,' 'degradable' or 'decomposable' or any form of those terms, or imply in any way that the item will break down, biodegrade or decompose in a landfill or any other environment. These restrictions apply to all sales in or into the State of California, including such sales over the internet. For sales in or into California, Plymouth Foam makes no claims that Earthhide products will break down, biodegrade or decompose in a landfill or any other environment.
